Dan,

We anticipated this issue and Bridgeton Landfill, LLC has obtained samples for radiological analyses. The samples are currently at Severn Trent Laboratories. The lab anticipates providing the results of the analyses to us by the end of next week. We will forward them on to you upon receipt. Thanks for taking the time to review the MMP.

Subject: Materials Management Plan

Paul,

I've read through the Plan and have no big issues with it. The only potential issue I can think of is that there is no info on the rad content of these materials. It is my understanding that coal ash typically contains trace radioactive elements including uranium, radium and their decay products. I don't know whether there is any potential for interference with the radiation screening.

I spoke with Eric Gilstrap, MDNR, last week. He is trying to get the Plan through Solid Waste and will report to us as soon as he can if there are any concerns.

I know Mike indicated that he would like written acceptance of the plan from EPA. Do you think an email to that effect would suffice?

Thanks,

Dan
